

PRIYA JHA

Data Analyst

Mumbai, India | 8433650706 | pjha63172@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Detail-oriented Computer Science graduate and Data Analytics intern with hands-on experience in Python, SQL, Power BI, and Plotly. Built five self-driven analytics projects and completed an internship covering data cleaning, exploratory data analysis, and dashboard development. Skilled at translating raw transactional and sales data into clear, actionable business insights. Seeking an entry-level Data Analyst role to apply strong analytical, technical, and problem-solving skills to data-driven decision making.

CORE SKILLS

- Programming & Query Languages: Python (Pandas, NumPy, Matplotlib, Plotly), SQL, Java (Basics), JavaScript
- Data Analysis: Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, Feature Engineering
- Visualization & BI Tools: Power BI, Plotly, Excel, Matplotlib, Dashboard Development
- Databases: MySQL, PostgreSQL, Redis
- Other Tools & Concepts: Git, GitHub, VS Code, Data Structures & Algorithms, DBMS, OOP

EXPERIENCE

Data Analytics Intern — ElevanceSkills

May 2026 – Jun 2026

Remote, Mumbai, Maharashtra, India

- Cleaned, transformed, and analyzed datasets using Python to improve data quality and prepare data for analysis
- Created interactive and visually appealing dashboards and charts using Plotly to communicate data-driven insights effectively
- Applied Python libraries including Pandas, NumPy, and Plotly for end-to-end data manipulation, analysis, and visualization

DATA ANALYTICS PROJECTS

Customer Shopping Behavior Analysis

[GitHub](#)

- Analyzed 3,900+ customer transactions across multiple product categories using Python and PostgreSQL to identify spending patterns and subscription behavior
- Engineered features and wrote SQL business queries to segment customers, then built Power BI dashboards to visualize findings for strategic decision-making

E-commerce Sales Dashboard

[GitHub](#)

- Built an interactive Power BI dashboard analyzing revenue, profit, customer behavior, and payment patterns for an Indian e-commerce business across four quarters
- Designed drill-down visuals to track product category performance, enabling faster identification of top revenue drivers

Diwali Sales Analysis

[GitHub](#)

- Performed EDA on festival sales data to uncover customer demographics and purchasing patterns, delivering insights for inventory management and targeted marketing

Retail Sales Analysis (SQL Project)

[GitHub](#)

- Set up and queried a retail sales database using SQL to clean data, perform EDA, and answer key business questions on sales trends and performance

Super Store Sales Dashboard

[GitHub](#)

- Built a Power BI dashboard combining sales, profit, shipping, and customer segment analysis with a 15-day sales forecast using time series methods
- Surfaced state-level performance trends to support regional sales planning

EDUCATION

B.Sc in Computer Science — Lord's Universal College

CGPA: 7.44

CERTIFICATIONS

- Python OOP: A Complete Course in Object-Oriented Programming
- AI for Beginners
- Master in Data Science to Become a Data Scientist

Soft Skills: Analytical Thinking, Problem Solving, Critical Thinking, Communication, Team Collaboration, Attention to Detail, Time Management
